

Initial Project Objectives

08/26/10

Based on the results of the MOU meeting held on August 26, 2010

- a. Remove the excess transportation infrastructure that currently exists within the Niagara Gorge Corridor.
- b. Provide appropriately scaled, direct, continuous and integrated improvements to the vehicular, bicycle, pedestrian and public transportation linkages between the points of interest (scenic, natural, cultural and historic attractions) along the Niagara Gorge corridor and within adjacent communities, neighborhoods and business districts.
- c. Create new and enhance existing connections with the adjacent community and the Niagara Gorge.
- d. Enhance opportunities for appropriately scaled uses within the Niagara Gorge Corridor by expanding the park experience up to and into the adjoining communities.
- e. Provide improved pedestrian access throughout the Niagara Gorge Corridor.
- f. Provide multi-modal recreational trails throughout the length of the corridor to points of interest and community destinations.
- g. Conserve, rehabilitate and protect the natural setting of the Niagara Gorge Corridor.
- h. Improve the visitor's and residence's experience, both in the park and in the adjacent community.
- i. Support the Niagara River Greenway's vision by providing access to and connections between the important resources within the corridor, giving rise to economic opportunities for the region.
